File Type:.DWG,.DGN,.DPT Supported platforms AutoCAD Product Key has been ported to a number of platforms over the years. AutoCAD for DOS was originally available only on MS-DOS. However, beginning with version 14 (1994), AutoCAD released a version for Windows 3.x/NT, with Windows 95 and Windows 98 versions following soon after. The DOS and Windows releases share the same file format, so although DOS support has been phased out, it is still available as an option in Windows versions of AutoCAD. A version of AutoCAD for OS/2 was released in 1998. AutoCAD for OS/2 is a part of AutoCAD LT. AutoCAD LT 2007 introduced full 32-bit versions of AutoCAD and AutoCAD LT. AutoCAD 2007 can run on 64-bit and x64 editions of Windows Vista and later. AutoCAD for Mac OS X began development in late 2002. AutoCAD for Mac OS X is published by Autodesk, under license by Apple Computer, Inc. AutoCAD Architecture for Mac OS X was launched in early 2010. AutoCAD LT for Mac OS X was launched in 2012. A 64-bit version of AutoCAD LT, AutoCAD X, was released in 2017. This version runs natively on Microsoft Windows 7 and Windows 8, Windows Server 2008 and Windows Server 2012 and includes.NET APIs, so it can be installed and run on these operating systems. AutoCAD X also includes a 32-bit native mode for Windows XP and Windows Server 2003. The 32-bit versions of AutoCAD X and AutoCAD LT do not run on 64-bit operating systems. A 64-bit AutoCAD has also been released for the iOS platform, which runs natively on iPhone, iPad and iPod Touch devices running iOS 4.0 and later, under the name AutoCAD. However, this version has not been as widely used as AutoCAD LT. Compatibility AutoCAD's compatibility requirements with its own file format have evolved significantly over time. For example, the functionality available to users of the.dwg (Dimensional Draw) format has changed in a number of ways. Over time, however, the core functionality of a.dwg drawing has remained the same. In early releases,.dwg files were monochrome (black-and- ca3bfb1094

Miami Herald columnist By Pete Thamel Since signing a three-year deal in November with the Miami Herald, Mark Emmert has run one of the best sports blogs in the United States, arguably even the world, by any standard. It is rare for a person to have such close access to one of the biggest names in all of sports. This Sunday, Emmert will be just a footnote on the story of one of the biggest upsets in NCAA men's basketball history. On Sunday, No. 16 Oregon will play its Final Four game against No. 7 Michigan, which would have never happened had not Emmert chosen to publish a column he'd written for the New York Times Sunday earlier this season. Emmert was hired as a sportswriter for the Times in 2007. In 2011, he switched to the Miami Herald, where he has been covering his specialty ever since. His blog, which is free to read, is part of what has made the Herald the strongest site for sportswriting in the country. "The Miami Herald is about the game," Emmert said Monday morning. "This has become a way of life for me, that I love doing this." Emmert's newest project has generated more traffic than any other in the past two years. With 10 million unique visitors in December, it was the second most-read sports blog behind Deadspin, according to Quantcast, which measures traffic. "It's awesome," Emmert said. "I'm still in awe of it." Emmert was given the freedom to write a column for the Times on any subject that he chooses. He said that some people in the sports world have a negative view of New York sports writers because they tend to write about money.
