## Truck Racing 2001 Os Gigantes Da Estrada UPDATED

There is no written documentation regarding the model. A: Thank you to everyone who helped and I finally managed to solve the problem. Youtube used to be an option for the 'Download MP3' but now they're only played using html5. The problem is that HTML5 doesn't support the audio tag that was used in the.m4a. This means that even though you can save the file, you can't play it unless you go through the hoops (copy, paste and convert into FLAC and upload into Google's servers) to make it playable through the Google Music service. Q: Android: Show a dialog before activity is finished I need to show a dialog, which is actually an abstract class, before my activity is finished. The dialog is extended to each activity and is added with the setContentView(R.layout.dialog) method. I use the code below to cancel the activity. The dialog shows up and the activity also cancels but only after a few milli seconds. I need the activity to finish it's current activity and then show the dialog. Is there any way to wait until the activity is finished before cancelling it? @Override protected void onPostExecute(String result) { Log.i("CANCEL WORK", result); super.onPostExecute(result); //Cancel all running threads and activities  
    Looper.cancelAll(looper); if(messageDialog!= null) messageDialog.dismiss(); } protected void  
    Looper.cancelAll(Looper looper) { Log.i("CANCEL ALL", "-> "+Thread.currentThread().getName());  
    looper.quit(); looper.quit(); } A: startActivityForResult() can be used to obtain a result back from the activity that you cancel. You would pass false as the last parameter to show the dialog instead of false to cancel the activity, and then setResult() to return a result using setResult(). Unexpected endosy
